

PIPER

Sensor Explorer

Ages 8+

Overview

Piper aims to prepare kids for the digital future with real-world problem solving and scaffolded challenges.

The new Piper Sensor Explorer, and its accompanying feature-rich software update, emphasizes the "S" in STEAM by allowing kids to collect data, explore scientific concepts and practice design thinking by creating their own innovations.

With Sensor Explorer, kids expand their knowledge and skills around what is possible to accelerate their curiosity, creativity and creation with technology.

Specs

- Color Sensor - Detects color
- Temperature Sensor - Reads temperature
- Ultrasonic Range Finder - Measure distance Sensor
- Profile Cards - Three reference cards
- Four Pin Diode Jumper Cables - Connect to the Piper Computer Kit
