

DELTACO SMART HOME LED light, E27, WiFi 2.4GHz, 9W, 806lm, dimmable, 2700K-6500K, 220-240V, white

SH-LE27CCTC is a smart LED lamp that can be placed in any E27 lamp holder. The lamp is dimmable so you can set the desired brightness yourself and you can also change the color temperature from warm white to cold white to get the right feeling in the room. The power output of SH-LE27CCTC is 9W which corresponds to about 60W from a traditional incandescent lamp.

With the DELTACO SMART HOME app you take care of all the handling of the lamp. Installation is quick and easy, all you need is a functioning wireless network, ie. no special hubs or gateways. In the DELTACO SMART HOME app you can control individual lamps individually or divide them into different rooms to easily manage a group of lamps. In addition to switching on or off a lamp, you can also set a timer if you want the lamp to turn off after a certain time. Alternatively, you can schedule specific times when it should be on or off. The DELTACO SMART HOME app also offers the possibility to create automatic actions. For example, the light comes on when the sun goes down, or if you want to group more lamps together to do the same thing at a given time. The DELTACO SMART HOME app is of course available for free download for both Android and iOS.

The SH-LE27CCTC can also be paired and voice-controlled together with Google Assistant or Amazon Alexa to easily integrate and become a part of the smart home.

- E27 pedestal
- Power: 9W
- Duration: 15000h
