

BOSON Creativity Kit

Inspire creativity through crafts with little hands.

Age: 5-8 SKU: EDU0085 STEAM

Cubee Combo: Ready-to-use, save time to outsource structural materials.

Combine with Cubee cardboard sheets to quickly build up fun projects.

Plug and play without computer.

Learn together with 17 hands-on projects.

A set of various sensors consist of temperature, light, motion, humidity, sound as well as 17 hands-on projects, guiding students step into the creative world of electronic making.

BOSON Science Kit

Experience real world applications of science in an easy and digitalized way.

Age: 7-10 SKU: TOY0084 Science

With science exploration activity cards and plant growing worksheets.

8 scientific sensors for physics, chemistry and biology.

Instant measurement result display on LED monitor.

Compatible with micro:bit and Arduino.

Boson science kit is a set of digitalized scientific exploration tool for young scientist to build their hands-on STEM lab.

BOSON Inventor Kit

Learn and build smart device.

Age: 5-8 SKU: TOY0083 STEAM

12 activity cards that teach kids how to build interactive projects with LEGO blocks, wearable materials.

A set of coding-free electronic building blocks of 37 modules, includes 7 input modules, 6 actuators, 24 function and power modules.

BOSON Workshop Set

Turn your classroom into a STEM workshop.

Age: 5-10 SKU: EDU0037 STEAM

Boson workshop set inspires young inventors by giving them a wider range of choice over 60+ Boson modules, allowing them to work in groups.

BOSON Coding Starter Kit for micro:bit

Easily learn coding and electronics from beginning.

Age: 7-12 SKU: EDU0080 Computer Science

micro:bit Recommended

Free download: mindplus.cc

12 quick start cards

Teaching book of 15 smart devices

Based on micro:bit, this kit includes 13 well selected modules, covering most popular digital and analog sensors, logic modules and actuators, supporting sound, light and motion interaction.

BOSON Artificial Intelligence Starter Kit

Real experience in the infinite possibilities of artificial intelligence.

Age: 7-12 | SKU: EDU0057 | AI

NeurOne module: understand basic knowledge of neural networks by controlling parameters.

An entry-level product that is designed for learning AI concepts, such as machine learning, neural networks and recognition patterns.

Mind+ Together with Mindplus coding editor, realize interactive projects of vision, voice and motion recognition.

- Image Recognition**
Identify facial and body features, hand gesture, daily objects, and other images
- Speech Recognition**
Identify words and phrases in spoken language and convert them to a machine-readable format.
- Text to Speech**
Translate text into multilingual with voice reader

micro:bit Recommended | Free download: mindplus.cc

BOSON

Play, Learn, Invent!

Electronic Blocks that Develop Logical & Creative Skills
A Powerful STEAM Kit for Kids

- Compatible With LEGOs**
Magnets Screws and Velcro
- Coding-Free Electronic Building Blocks**
- Fool-Proof Easy to Connect**

Color-Coded Easy to Distinguish

50+ Different Modules With Varying Functions
