

OKdo clear PVC case

Low cost protective case for the micro:bit V2. This case is made from soft transparent PVC that enables all sensors to work as if there wasn't a case fitted including the light sensors, sound sensor, compass, touch sensor, buttons and gyro. The shiny material is perfect for schools where a quick wipe down between lessons is required.

- Fits like a glove
- Soft robust PVC
- Available in packs of 5 or 300
